

Serial No. 09/756,453
Docket ADO 0069 PA

Please amend claims 15 and 17 as follows:

Sub C4 ~~15.(Amended) In combination, a heat activated expandable sealant and a flow control agent on at least a portion of said sealant, said combination adapted to seal a gap or cavity in a component; wherein said heat activated expandable sealant and said flow control agent melt and flow upon heating to a temperature sufficient to cause said sealant and flow control agent to flow; and wherein said heat activated expandable sealant has a melt flow rate which is higher than the melt flow rate of said flow control agent.~~

BB *Sub C4* ~~17. (Amended) The combination of claim 15 wherein said flow control agent comprises polyvinyl acetate.~~

Please add new claims 21-25 as follows:

Sub C4 ~~21.(New) The combination of claim 15 wherein said heat activated expandable sealant and said flow control agent melt when heated to a temperature between about 250°F to 400°F.~~

BB ~~22. (New) The combination of claim 15 wherein said heat activated expandable sealant includes a blowing agent.~~

~~23.(New) The combination of claim 15 wherein said flow control agent is in the form of a mesh or film.~~

~~24.(New) The combination of claim 15 wherein said flow control agent is in the form of a dry coating.~~
